## Action Items and Alerts

### Data Sheet

### Action Items and Alerts

Action Items & Alerts in OmegaCube ERP helps manufacturing and distribution personnel to stay on top of their day-to-day tasks and get things done on time.

It helps communicate key action items and operational alerts to personnel right away.

It eliminates manual, paper-backed methods of communication, and greatly improves operational efficiency & personnel productivity.

### Alerts & Notifications

- Pushes relevant alerts to personnel responsible for performing specific tasks & making decisions.
- Alerts trigger the specific personnel who need to know after completion of each operation.
- Alerts focus on data specific to decision-making - thereby reducing report dependency and printing.
- Keeps users well-informed in advance about events that may impact them.
- Based on fluctuating demand, auto-generated alerts and exceptions allow users to create, delay, expedite, or cancel supply according to the most current need.
- Drill-down to detailed lists from summary alerts, and subsequently drill-down to individual transactions.

### Action Items

- Defines action items based on operational workflows and individual roles.
- Access summary of key action items through the workflow dashboard screen.
- Action Items keep the user focused on what they should act on.
- System generated actions to create requisitions, Purchase Orders, RFQs, Work Orders, Sales orders etc.
- Push based workflow automation for greater business efficiency.
- Workflow automation that helps drive critical workflows within a process.

### Action on the Move

- Access critical alerts and notifications from smartphones & tablet devices.
- Access from any supported browser.
- Get notifications at every manufacturing stage regardless of current-location.
- Improve response-time, decision-making, and productivity.

Since 1999, OmegaCube has consistently believed in building and delivering powerful products with a single philosophy,

*No two companies operate exactly the same, and they need flexibility in their systems in order to sustain their competitive edge, always.*
