

WHY

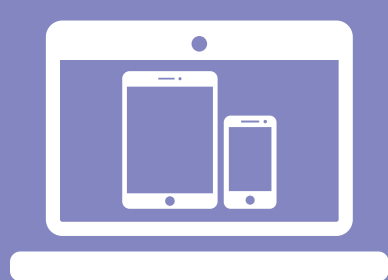

MANUFACTURERS ARE PREFERRING LOW CODE & DIGITALLY ADVANCED ERP SOFTWARE?

Browser Run ERP

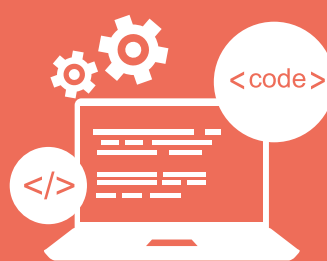

- 🌐 Run ERP instance on any supported browser.
- 🌐 URL & login-based access to ERP.
- 🌐 Access ERP from anywhere, anytime.
- 🌐 Quick, advanced & user-friendly.
- 🌐 Eliminates .exe installation & configuration on computers and devices.

Device Mobility

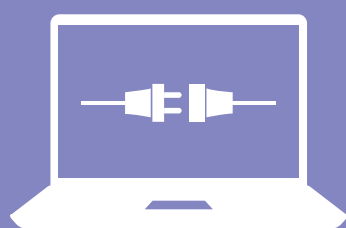

- 📱 Access ERP from any smartphone, tablet or laptop.
- 📱 Access & update critical data on the move.
- 📱 Operate from home, on-premises, client location and even from vacation.
- 📱 Improve operator speed & efficiency.

Low-code Customization

- ⚙️ Customize select modules without over-writing other modules.
- ⚙️ Reduce associated time and costs.
- ⚙️ Customize quickly and go-live immediately.
- ⚙️ Customize with minimal coding & development.

Plug-n-Play Integration

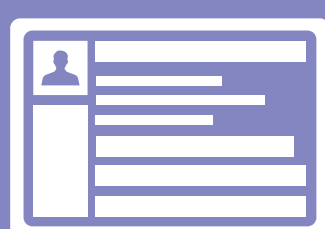

- 🔌 Integrate external applications & internal tools quickly.
- 🔌 Integrate with Nesting, Barcode, Shipping, Design, Machine Interface apps.
- 🔌 Integrate with minimum setup & configuration.

Advanced Personalization

- 📊 Personalize reports, dashboards, charts, trends, graphs based on role & function.
- 📊 Utilize simple configuration tools to develop data visualizations.
- 📊 Enhance reports with minimum technical knowledge.

Self-Service Portals

- 👤 Provide self-service portals to customers and suppliers.
- 👤 Improves communication & collaboration.
- 👤 Enable access to crucial sales, product & operational data.
- 👤 Eliminates time consumption pertaining to calling up for info everytime.
